Pineapple	Crushed, sliced or cubes, 2 tins for.	25c
Have You Ordered Your Easter Suit ?		

School Fair Jottings

It is getting time now that we know which schools intend to be in the School fair this year; we had hoped to have had the Annual meeting before this, but it will have to wait for better weather.

The next thing will be the seed order forms, and we shall be glad if school secretaries will notify us to that we shall know who need them.

The new bulletins have not yet arrived, but the teachers have had the list of changes in the school work; and, as there will not be any changes in the other classes, the old bulletins can be used in the meantime.

Teachers are urged to try to interest their pupils in starting the preparation of exhibits, such as sewing, manual training, grain samples etc. Which require considerable time for preparation, and which may be prepared long before the

Special Greyhound Fares

Greyhound special round trip rates at the regular one-way fare will be in effect from all points in Alberta, British Columbia and Saskatchewan to the Calgary stock show, tickets to be on sale to the General Public from March 27th to April 2nd, return limit April 4 1938, and to be on sale to Judges and Exhibitors from March 25th to April 2nd inclusive. return limit April 4th, 1938.

By distributing the efforts of the pupils over a greater part of the year, larger and better exhibits should be the result.

The co-operation of everyone interested, and any information will be gladly given by your

Funeral Services of Mrs. Adderley

Despite the very severe weather, Saturday last, the Anglican Church was well filled with sympathisers, who turned out to pay their last respects to Mrs. (Auntie) Adderley. Rev. A. D. Currie, during his discourse, spoke of the faithfulness of Mrs. Adderley, to the church, and held her up as an example to many. The hymns selected were "Abide with me" and "Nearer my God to thee". The following acted as pall bearers: J. H. and H. Whitfield, C. Asmusen, H. Fitzpatrick, N. Johnson and J. Belshaw. Interment was made at the local cemetery.

Lady Curlers.

The Crossfield Ladies curling Club staged a very successful one-day bonspiel, with rinks from Carstairs Didsbury competing.

The ladies really have it over the men when it comes to curling; they kept the grand challenge prize at home. The rink was comprised of Mrs. C. H. McMillan, skip; Mrs. W. J. Wood, third; Mrs. E. Devins, second; Miss Pat Waterhouse, lead. The consolation prize went to a Didsbury rink, composed of Mrs. Fisher, skip; Mrs. Edwards, third; Mrs. McCoy, second; Miss Mary Wigglesworth, lead.

Wedding

McLaren—Parsons
The home of Mr and Mrs. D. H. Parsons, of Madden, was the scene of a pretty wedding on February 16th, when Leona E., second daughter of Mr and Mrs. L. F. Parsons, of Dog Pound, was united in marriage to Donald J. McLaren, eldest son of Mr and Mrs. J. A. McLaren, of Dog Pound. The bride was given away by her eldest brother. The only attendant being her sister, Lena. The groom was attended by his brother, Stewart.

Rev. Cambell, of Carstairs officiated.

It's An Old, Old Story . . .

There are persons who constantly clamor.

They complain of oppression, speculation and pernicious influence of accumulated wealth.

They cry out loudly against all banks and corporations and all means by which small capitalists become united in order to produce important and beneficial results.

They carry on mad hostility against all established institutions. They would choke the fountain of industry and dry all streams.

In a country of unbounded liberty, they clamor against oppression.

In a country of perfect equality, they would move heaven and earth against privilege and monopoly.

In a country where property is more evenly divided than anywhere else, they rend the air shouting agrarian doctrines.

In a country where wages of labor are high beyond parallel, they would teach the laborer he is but an oppressed slave.

Sir, what can such men want? What do they mean? They want nothing, sir, but to enjoy the fruits of another man's labor.

They can mean nothing but disturbance and disorder, diffusion of corrupt principles and the destruction of the moral sentiments and moral habits of society.

Since January 28th we have had quite severe weather. In fact, until this week it has not been above zero.

Dramatic Society.

The Crossfield Dramatic Society has achieved many successes since organizing, but is working hard to do better than ever. Some notable players have been lost, but it is intended to present a well finished play in keeping with the best traditions of the Society.

Rebekah Entertainment.

In spite of 26 below zero and a South East wind Justice Rebekah Lodge held a very successful Bridge and Cribbage party on Monday February 14th.

There were six tables of Cribbage and five of Bridge. The prize winners for the Cribbage were: Mrs. H. Ballam, Ladies' High; Corporal Cameron, Gentlemen's high. The low prizes going to Mrs. O. Bills and to W. A. Hurt.

In the Bridge Miss Fanny Gough was high Lady and Mr. Garnet O'Neil high Gentleman. The lows going to Mrs. Charlie Aldred and Emil Sauter.

The members of the Lodge would like to thank all those who turned out in such severe weather and helped make the evening a success.

CARD OF THANKS

We wish to extend our sincerest thanks to our many friends for their help given our Aunt, Mrs. A. (Auntie) Adderley, also for the sympathy shown at her passing. We cannot single anyone out, as all were so good to her

From the Family.

Interesting Talks.

Despite adverse weather conditions, a large crowd attended the McCormick-Deering tractor and Diesel School held in the U. F. A. Hall on Saturday, under the auspices of W. Laut, local dealer.

The programme, comprised of talking pictures, covering the history of transportation in America, the operation and theory of Diesel Engineering and other short subjects of an educational nature. Mr. M. Minton, service man for Calgary and district, gave a very interesting lecture on "Tractors; their Care and Operation". At noon, coffee and sandwiches were handed out, and this, with free cigarettes, went to make up a most successful Tractor School.

Messrs. Allan, Hansen Mathewson and Sinclair were in charge of the programme.

Madden Murmurs

From Our Own Correspondent

Mrs. H. Walsh was a Calgary visitor Thursday and Friday of last week.

Mr. Howard Farquharson, who has spent the last few months in Ontario, returned to his home here, on Thursday.

Miss Ane Aaskow returned to Calgary on Monday after spending the weekend with her parents. The next meeting will take place at the home of Mr. Jack Ealy on February 22.

What are these strange sounds that are beginning to be heard around Madden? Could they be Wedding Bells? (Yes, they have rung—Ed.)

The regular meeting of the Madden Young Peoples Club was held at the home of Miss Violet Poffenroth on Tuesday February 8th. Further plans were made for the Valentine Dance on February 18th at the Madden Hall. The Social part of the evening was spent playing Court Whist. Prizes were won by Miss Florence Cruikshank and Mr. Jack Ealy. A lovely lunch was served by the hostess.

Possible Winners in Big Six Hockey League

Following is a list of possible winners in the Big Six Hockey League, as picked by some local fans, who really know hockey. Laughlin' Dick says the Miners look pretty good to him. George says, "How can you overlook the Rangers after leading the pack all winter they look like a 'cinch'." "Give me the Miners everytime!" says Lake Parsons. Everett puts all his dough on the Elks. They're a sure bet to come out on top. Steve says there isn't a team that can touch the Rangers. We could not find anyone who would give the Dominion a chance so we will just follow our hunch and go against George and Everett, which is always a sure way to win.

C.G.I.T. Tobogganing Party.

Fourteen of the local C.G.I.T. Group, with their leader, Miss Fannie Gough, journeyed to the home of Miss Ruth Richardson on the afternoon of Saturday February 12th. The afternoon was spent in skiing and tobogganing. At 7 o'clock a delicious supper was served by Mrs. Richardson. Afterwards, the young people resumed their outdoor sports, as it was a bright moonlight night. Everyone had a most enjoyable time, and only two casualties were reported: Cora and Mabel having sprained their ankles. The girls left for their respective homes about ten o'clock, happy, but ready for a good night's sleep, and take the Dominions against the field.

Inequitable Taxation

Cogent and powerful were the arguments recently advanced by Premier Angus Macdonald of Nova Scotia in support of his advocacy of centralization of taxation in the Dominion before the Rowell Commission on Dominion-Provincial relations in Halifax when he contended that this method of taxation would be "more equitable, efficient and productive."

The Nova Scotian premier's suggestion was made more particularly applicable to income tax, corporation taxes and inheritance taxes—the latter being better known in the west as succession duties, the intention being to make these taxes national in scope with provision for the distribution of the proceeds among the provinces by a Federal grants commission "on a fiscal need basis."

On the score of greater equitability of division of taxation proceeds as between the provinces, Premier Macdonald's arguments were particularly pertinent when applied to succession duties, or inheritance taxes, declaring that in this respect the central provinces enjoy a preferred position. He backed up this statement by figures showing that in 1934 Ontario collected 59.1 per cent. of all succession duties collected in all provinces, while Quebec collected 24.4 per cent., making a total of 83.5 per cent. for these two provinces alone and leaving only 16.5 per cent. for the other seven provinces combined.

At Head Office

The reason for the large share of succession revenues absorbed by the Provinces of Ontario and Quebec is not far to seek when it is pointed out that as the law stands to-day succession duties on intangible property, such as stocks and bonds and mortgages, are payable to the government of the province in which the assets represented by the securities are located. In interpretation this is held to mean that the duties are payable to the province in which is located the head office of the corporation issuing the securities, since, with the exception of the banks, these companies refuse to open offices for the transfer of stocks and bonds and similar instruments in the other provinces.

This situation has long been felt to be a discrimination against the maritime and western provinces, but in more recent years it has become aggravated with the collapse of realty values and the consequent transfer of considerable wealth to the intangible property form and the increasing issuance of securities for the development of natural resources.

But even worse than this, is the fact that the provinces in which the deceased was domiciled regard it as their inalienable right to collect inheritance tax on intangible property, as a result of which beneficiaries are called upon to pay a double tax, one to the domiciliary provinces and another to the province of situs, to quote a legal term.

Future Effects

Some years ago efforts were made to provide for the passage of reciprocal agreements between any two or more provinces with the object of relieving estates from double taxation but so far little or no advantage has been taken of this proposal.

As far back as 1925 the inequity of succession duty taxation and the burden it is throwing upon estates, especially upon estates in the western provinces which are perforce usually very small, was pointed out by E. H. Barr, K.C., of Regina, in an interesting and informative address on the whole subject before the Bar Association of Canada in which he said:

"There has been very little reciprocity among the Provinces and it is very unlikely that this provision (providing for mutual agreements) will ever become effective. It would appear to us that instead of each Province attempting to deal individually with each other province, representatives of all Provinces should meet at a common table and devise some plan to which they will all be party and which will automatically take effect in all Provinces at the same time."

In an exhaustive, though compact treatise on the subject, the result of over a year of laborious study and research, Mr. Barr referred to a recommendation made earlier in that year by H. M. Fisher, a Winnipeg barrister in a brief to the Manitoba Tax Conference in which he suggested, among other things, the creation of an inter-provincial board with power to adjust equitable claims of multiple taxation as between provinces and provide for some Federal body to collect and distribute among the provinces entitled to the taxes so collected.

It should be possible," said Mr. Barr, commenting upon this suggestion, "to arrange some satisfactory basis for the division of this particular tax among the Provinces entitled to share in it. If it were stock in a company the tax might well be divided among the Provinces in which the enterprise is carried on on the basis of the annual business turnover in each Province, or some other arbitrary basis making for a reasonably just apportionment."

Double Discrimination

Enough has been said to demonstrate beyond dispute the inequity of the allocation of succession duties resulting in discrimination against not only the less wealthy provinces but also the heirs and beneficiaries of decedents.

The evil has existed long enough and is becoming more apparent with the increase in deaths in the western provinces as original and first generation settlers pass away. It is a question which should be settled without further delay in some such manner as that proposed by the Premier of Nova Scotia or the Winnipeg or Regina legislatures. The underlying principles enunciated by all of them and other authorities are very much the same.

Australian Defence

Can Offer Security For British Fleet
In Time Of Trouble

Any doubts about the necessity for preparing, while we have leisure, for the defence of British interests in the Pacific have now been cleared away.

In any preparations of this kind Australia must play a leading role. While Australia is ill-fitted even to defend herself against a strong raiding force, much less an invader, Australia is an embarrassment, not a source of strength, to British power in the Pacific.

On the other hand, an entirely new character will be given to the situation in the Pacific when Australia on the northern, eastern and western sides can offer security to a British fleet; when Australia is the base of a considerable and self-contained air force, and the home of an industrial organization capable of supplying munitions of war to a force which otherwise would have to depend on supplies carried halfway round the world, through seas possibly made dangerous by a European enemy.—Sydney Herald.

FROM GIRL TO WOMAN

Growing girls are often sufferers from female irregularities, headache, back-ache or nervousness. Dr. Pierce's Favorite Prescription is the vegetable tonic to give your daughter or such times. Mrs. Gladys Stevens, of Alex. St. Catharines, Ont., said: "My daughter, who is now 16, was very nervous and nervous. After using it I gained several pounds, due to the fine appetite it gave me. It became much stronger and my nerves calmed very little trouble. Buy now of your druggist. New size, tablets 30c. Liquid \$1.00 and \$2.00.

In Rural Areas

Lightning Causes More Havoc Than It Does In Cities

Nine-tenths of the property damage caused by lightning occurs in rural areas, it is reported in the first sections of the "Code for Protection Against Lightning," issued by the U.S. National Bureau of Standards, states Science Service. Four hundred people on an average are killed each year in the United States by electric bolts from the sky.

Proper use of lightning rods sharply cuts damage to buildings struck by lightning, it is asserted. Users of lightning rods are cautioned to see that they are properly connected to the ground. Placing lightning rods on small buildings in urban areas, particularly near large buildings, is uneconomical because of the protection afforded by the larger structures, it is stated. Large buildings should always be bonded.

Persons caught out in the open during an electric storm are advised to seek shelter in as large a building as possible. Failing that, they should seek the shelter of a cliff or a dense forest. The code was prepared under the joint sponsorship of the American Institute of Electrical Engineers and the National Bureau of Standards.

Gave Him An Idea

Bath Tub Helped Inventor Solve Oil Company's Problem

One of the difficulties against which mining engineers who bore for oil have to fight is the seeping into their wells of water through the pores of underground sand. Now a Texas company has invented a process which will prevent this.

The inventor received his brain-wave when he emerged from his bath and noticed the formation of scum round the bath by the reaction of the soap to the salts in the water. Now they pump ordinary soap solution into oil wells, and this reacts with magnesium and calcium salts to form a tough curd which binds the pores and underground sands and makes the well water-tight. The process does not interfere with the oil flow.—Montreal Star.

Reducing Process

Going home during the evening rush hour I struggled into a tube train at Oxford Circus. Finally the doors closed, and everybody was wedged tight, unable to move. In the thickest was a short, fat Cockney woman, who remarked to the passengers in general: "I comes in 'ere like Stanley Baldwin and goes out like Anthony Eden!"—London Evening News.

Grass can now be given green medicine: a government scientist has found a green dye that controls grass diseases and at the same time keeps the sickly grass a pleasing green color.

Through observations of the moons of Jupiter, it was learned that the passage of light through space is not instantaneous. 2242

Miners Rescue Dog

Animal Was Marooned For Six Days
On Narrow Ledge

Buster is back. The dog that gave people in an Ontario mining camp an anxious time of it during the six days he was marooned on the side of a 300-foot cliff is safe.

It is a tale that reverses the traditional role of the St. Bernard. Ordinarily one pictures those somber-eyed, deep-jowled fellows getting somebody out of trouble rather than getting into trouble themselves. But an outburst of ecstatic foolishness not uncommon to his strapping kind impelled this 120-pound specimen of perennial puppyhood to pursue his own tail. That aimless prank landed Buster on a narrow ledge high up on the face of a cliff near his master's camp.

How he got out of that fix is a tale best told by those anxious Ontario miners who listened to the dog's whines several days before he was located. Food was dropped on the ledge. Much of it got nuzzled over the brink and fell into the lake far below, but the dog retrieved enough to keep him quiet while the community planned the rescue. Finally, a rope was knotted and looped every five feet and lowered over the cliff. The rescuers then manned the rope, each man crocking an arm into one of the loops. Buster was bundled into a canvas sling. Willing hands hauled the living chain aloft.

And a wisp of the tail and an appealing gaze mean what we like to think they mean, though dogs do realize that even men can sometimes show as much devotion as a dog.—Christian Science Monitor.

PANEL-FROCK SOLVES ALL
PROBLEMS OF MATRON
WHO WOULD LOOK SLIM.
By Anne Adams

The panel-frock, perennial favorite of all women—like the flattery, is at its best in Pattern 4715—dramatic, easy-to-make design by Anne Adams! A colorful, printed linen, silk, or cotton would "do it proud" and you may have your panel in a contrasting, monotone fabric if you wish for this gives long lines that add to your height! You're sure to find the above-the-elbow sleeves specially comfy and becoming. V-neckline, trim skirt, and a fascinating row of buttons also contribute to your height. You'll be glad to know that this frock can be stitched up in no time, so order your pattern to-day and make your frock in time for Spring!

Pattern 4715 is available in women's sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50. Size 36 takes 3 1/2 yards 36 inch fabric. Illustrated step-by-step sewing instructions included. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Experts know of about 1,600 different varieties of apples.

Cattle Boats Needed

Lack Of Proper Ships Slows Up Exports To Britain

If live cattle could be piled tier upon tier in the hold of a ship there would be no problem connected with exporting our surplus to Britain when the domestic and United States markets were unattractive. Unfortunately ships carrying live cattle must be fitted for the purpose, and when there are no cattle cargoes the fittings are an obstacle to the economical use of space. That means that the equipment is removed from the ships when space for cattle cargoes is not in demand and then when exporting is desirable, as it will be during the early months of this year, it is difficult to find space for all the cattle we could otherwise place on the Old Country market.

In former years as many as 60 to 70 thousand head went across in the season. Then cattle were admitted to United States markets on payment of two-cent duty when prices were particularly favorable. That abolished the export trade and the cattle boats were obliged to seek cargoes of another kind. United States markets are now suffering a severe reaction from the high prices of 1937, and many cattle feeders in Ontario are again turning their attention to the overseas outlet. Exports this month will probably reach the figure of 2,500 or more, and that is only a small percentage of the total number that would cross the Atlantic if there were enough boats equipped and willing to carry them.

The shipping of live cattle to Britain is still one of the unsolved problems of our day.—Farmer's Advocate.

A Biological Mystery

Many Things About Giraffe Which Are Hard To Explain

Only one man has ever claimed to have heard a giraffe use its voice. Professor Julian Huxley told an audience of children in a lecture on rare animals at the Royal Institution, London.

Prof. Huxley was unable to say, however, how the man came to talk to the giraffe and what reply he got because "the animal is the eternal biological mystery."

"It has the longest throat in the world and a perfectly good voice apparatus inside it—but never utters a word," he said.

Another puzzling thing about the giraffe, he said, was how it maintained a constant blood pressure to its head, which may be 18 feet up in the air.

"And why is it that whales—the biggest and strongest of creatures—die young? For only a few have lived to the age of 20. They may be 100 feet long and weigh 150 tons—more than a whole family of elephants put together, but they develop and die very rapidly."

The League of Nations health survey shows that before the World War men reached their full stature at the age of 25; since the war at 20. Why, nobody knows.

America's first inter-colonial postal delivery of mail was made in January, 1672, between New York and Boston.

I WAS NEVER SO EMBARRASSED

-FOR I KNEW THAT
ACID-INDIGESTION
WAS DISTRESSING TO
ME AND OFFENSIVE
TO OTHERS
BUT NOW—I JUST

ALKALIZE
THE EASY
"PHILLIPS"
WAY

The quick way to alkalize is this: Take two teaspoons of Phillips' Milk of Magnesia 30 minutes after eating and drinking. Or, when among others—take two Phillips' Tablets that come in a small flat tin you carry in purse or vest pocket—You do it unnoticed. Relief is almost immediate. "Gas," flatulence, acid heartburn and other offensive symptoms leave. That "stuffed," feeling and pains from "acid indigestion" come to annoy. You feel great.

This is the way, we believe, more doctors use than any other when alkalizing upset stomach.

A City Of Museums

Paris can boast of one of the largest collections of museums of any city in the world. Museums devoted to painting, sculpture, music, jewels, geology, hygiene, commerce, costumes, lighthouses, fire-fighting, policing and innumerable other arts bring the total in the city limits to 61.

STOP Scratching

RELIEVE ITCHING IN A Minute
From the most itching conditions, whether it be eczema, psoriasis, urticaria, hives, or other skin eruptions, the relief is instant. The cream is applied to the affected area and the itching is relieved. The cream is applied to the affected area and the itching is relieved. The cream is applied to the affected area and the itching is relieved.

Warehouses at Calgary, Regina and Winnipeg

GRAIGAVON GAINS TWO SEATS IN IRISH ELECTIONS

Belfast.—With all counting in the general election completed with the exception of the four-member constituency of Queen's University, Viscount Craigavon's Unionist government was returned stronger than before.

It did not lose a seat and gained two. Its 21 victories, with 14 acclamations on nomination day, gave it 35 seats. In the last house the government held 37 seats, including the four Queen's University seats.

In Dublin, Prime Minister Eamon de Valera declared the Northern Ireland general election returns change nothing as far as his is concerned, and that the first question he would press at the next Anglo-Irish conference would be that of unification.

Belfast celebrated with band processions, parades and the customary clashes among excited partisans. From his official residence, Stormont Castle, Lord Craigavon declared the result definitely and finally settled that Northern Ireland will not exchange its unity with the United Kingdom for unity with Eire.

The Unionist (Conservative) party tumbled the leaders of three opposition parties, all in Belfast constituencies. Home Minister Sir Dawson Bates, the only cabinet member not returned by acclamation, was victor in a three-cornered contest in Belfast's Victoria division.

The defeated leaders were William J. Stewart, who led a revolt within Lord Craigavon's own party and organized the Progressive Unionist group; W. M. Wilton, Independent Unionist leader, and Harry Midgley, head of the Labor party.

Mr. Stewart was defeated in the Cromac division of Belfast, losing to J. Maynard Sinclair, Unionist, by 3,532 votes. In 1929, the last contested election in Cromac, the Unionist majority over an independent candidate was 2,434. In 1933 the Unionist were unopposed.

German Army Shakeup

Reports Say Three Generals Have Offered Their Resignations

Berlin.—Diplomatic quarters heard reports that three generals offered their resignations in protest against the reorganization of the German army and wondered whether there are many discontented higher officials.

Observers familiar with Chancellor Hitler's tactics said all necessary precautions against army opposition naturally were taken before the Chancellor embarked on his drastic shakeup of the army high command and the foreign office.

Meanwhile, Nazi party headquarters, with Heinrich Himmler, chief of all German police, as the prime mover, was said to be preparing an order for "Nazification" of the army. It was reported the order would eliminate chaplains from the army, make the Nazi salute obligatory, confine recruiting of future young officers to men who attended Nazi party institutions of learning; and place a political commission on each army staff.

Fast Plane Flight

Flew From Edinburgh To London At Speed Of 400 Miles Per Hour

London.—A Royal Air Force Hurricane fighter plane flew from Edinburgh to London at the approximate speed of 400 miles an hour.

Squadron Leader John W. Gillan took off from Turnhouse airfield, Edinburgh, and landed at Northolt airfield, near London, 48 minutes later. Officials claimed it was the first flight in darkness at a speed over 300 m.p.h.

It was announced Squadron Leader Gillan bettered the world record for land planes, held by Germany at 379.17 m.p.h.

Wilkes To Continue Search
Edmonton.—The next area to be covered in the hunt for six Soviet flyers who disappeared during a flight from Moscow to North America will be the Alaskan mountain ranges. Lieut. Wilkes, commander of the Russian plane conducting the search, told a service club.

British Navy Recruits

London.—Recruits for the Royal Navy averaged 1,154 monthly last year as compared with 871 per month in 1936 and 624 monthly in 1935. Alfred Duff Cooper, first lord of the admiralty, announced in a written reply to a question in the House of Commons.

Decide On New Course

Plan Would Withdraw Foreign Volunteers From Spain

London.—Foreign Secretary Eden was believed to have decided on a new course to obtain withdrawal of foreign volunteers in Spain and approach more cordial relationship with Italy in one diplomatic sweep.

It was reported the foreign secretary will shelve discussion of Spanish belligerency rights temporarily to make progress on other angles of the problem.

Britain and France, diplomatic quarters said, now aim to convince Premier Mussolini a government victory would not mean Bolshevism in Spain. The argument is that Spanish Communists are not likely to control the Socialist administration of Dr. Juan Negrin.

Thus, these quarters stated, Mussolini will have an opportunity to withdraw his blackshirts and yet tell the Italian people he fulfilled his aim in saving Spain from Bolshevism. Alfred Duff Cooper, first lord of the admiralty, told commonsense government believes measures taken to contract the renewed outbreak of practical attacks on British shipping in the Mediterranean will have the desired effect.

Anarchy In China

Banditry Causing A Lot Of Trouble For Japanese Army

Shanghai.—A grave state of anarchy and lawlessness was reported straining authority of Japanese in North China while their armies struggled to conquer a vast area of central China along the Lunghai railroad.

Despatches from Tientsin said that after the Japanese expelled Chinese officials in captured north China provinces, these areas relapsed into banditry and civil disorder.

It was reported conditions had become intolerable for peasants who did not flee from their homes during the Japanese invasion and that marauding bands were preying on the countryside.

Japanese authorities in Tientsin charged Communist agents were active in stirring up the people to unprecedented anarchy.

Japanese troops were said to be mopping up bandits and alleged Communist agents. Bands between Tientsin and Paofoing. Authorities have tried to persuade them to surrender and, according to Chinese reports, 100,000 of them agreed to do so.

Reports said 80,000 others, mostly former Chinese militia, homeless peasants and professional bandits, were holding out. Chinese and Japanese authorities offered rewards for arrest and the heads of alleged outlaws.

French Are Pleased

Say Coming Visit Of British Sovereign Omen Of Peace

Paris.—In a chorus of praise for Great Britain, its royal family and the bonds of friendship that extend across the English Channel, the French press heralded the coming visit of King George VI and Queen Elizabeth as an omen of peace and strength.

The state visit is set for late June, when King George will dedicate the Australian war memorial at Villers-Bretonneux and be the guest of President Albert Lebrun in Paris. A sidelight was the possibility of a meeting in France between George VI and his elder brother, the Duke of Windsor. One newspaper suggested the brothers "in order to avoid the curious, may meet secretly outside the capital."

French Flying Boat Wrecked

Eight Persons Killed When Airliner Crashed Into Breakwater

Marseille, France.—Eight persons were killed and four injured in the crash of an Air France flying boat against the Marseille breakwater at the takeoff. The trans-Mediterranean airliner was starting its scheduled flight to Corsica, on the Marseille-Tunis run. It burst against the breakwater at 60 miles an hour and burst into flames.

Air France announced the dead were five passengers and three of the crew. Two passengers and two of the crew were injured. All the dead were French. Officials thought pilot probably failed to see the breakwater through morning fog and mist.

Slot Machines Barred

North Bay, Ont.—City council has decided to instruct the police commission to have all slot machines removed from North Bay by March 1. License fees for the machines brought \$1,250 to the city treasury last year but council decided to forego the money to rid the city of what it termed "undesirable gambling influence."

Taking Important Part

U.S. Volunteer Pilots Said To Be Aiding China

Hankow, China.—Chinese sources asserted United States volunteer pilots were taking important parts in China's attempts to rebuild her air defenses against Japanese invasion.

This disclosure came as Japanese bombing squadrons, apparently in retaliation for a Chinese air attack in which Americans were said to have taken part, raided Hankow, temporary capital of China. One Japanese raider was shot down.

Chinese military despatches said the "foreign legion" played an important role in operations along the Hwai river, northeast of Hankow, now China's major battlefield. There pilots flying highspeed bombers made in the United States were said to have blasted so effectively at Japanese artillery positions and troop concentrations that Chinese infantry for the first time in the seven-month-old war was able to advance with support of its own air force.

PLANS FOR CHEAP LOW COST HOMES ARE ANNOUNCED

Ottawa.—This year's crop of new, low-cost homes will probably feature conventional lines as a result of the Dominion Housing Act minimum cost house competition in which the winners were announced. None of the modernistic, flat-roofed types were chosen.

From 500 designs entered by architects in every province the judges selected 10 which will be completed with full working plans to be made available at a cost to meet the burden of even the most humble builder.

Winners in the contest will receive \$250 each when the plans are completed and turned over to the government, and the plans will then be sold to prospective builders at \$10 each.

The designs were for houses to cost not more than \$2,500 in British Columbia or \$3,000 elsewhere in Canada, insulated, containing three bedrooms, living-room, dining-space, kitchen, bath and basement. Winners in the contests were architects and firms in Quebec, Ontario and British Columbia.

Gable roofs predominated in the designs chosen, with many mansard and "hip" roof models of extreme simplicity was the keynote of all. Materials to be used were left to the option of the builder.

In some instances provision was made for one bedroom on the ground floor with the dining room or alcove combined either with living room or kitchen. Only one or two plans provided verandas or patios.

The finished plans will be available to any person desiring to buy, whether it is proposed to build under the Housing Act or otherwise.

Following are the winners: Forney, Page and Steele; Greenbush and Langley (two designs); and Douglas E. Kirkland, all of Toronto; Paul Rousseau and A. H. Tremblay, Quebec; Edward Cecil Cox and T. H. Mace, Montreal; Alvin Ronald Frack, Hamilton, Ont.; and Harold Culverne, Vancouver.

\$125,000 GIFT TO SEND SCHOOLBOYS TO CANADA

With Earl Baldwin as its patron, a \$125,000 trust has been established by a Bradford, England, business man, to give fifty schoolboys a month's visit to Canada every year for the next five years. The donor, Mr. Walter Rhodes, is seen above signing the trust at Grosvenor House, London, watched by some of the Trustees. Mr. Rhodes brought Bradford boys to Canada last year as a Coronation gift.

NEW PUBLISHER

A new photograph of Mr. J. W. McConnell, who succeeds the late Lord Atholstan as owner and publisher of the Montreal Star.

Britain's Food Supply

Says Suggestions For Storing Two Years' Supply Is Feasible

London.—Sir Thomas Inskip, minister for co-ordination of defence, declared Labor suggestions for storing two years' food supply for use in case of emergency were fantastic.

He said the government should periodically, secretly if possible, make purchases of food supplies according to the needs of the situation. It was undesirable, he argued, to put large quantities of foodstuffs into ports liable to attack.

"On for ton, and ship for ship, we are substantially in as good a position to-day as in 1914," Sir Thomas told the house in opposing a Labor resolution demanding the minister as having done nothing to relieve the country's anxiety in regard to food supplies.

The house defeated 195 to 130 the Labor proposal that large stocks of food be stored in the country.

Debate Power Export

Opportunity To Be Given For Members To Discuss Question

Ottawa.—Notice of a bill to amend the Electricity and Fluid Exportation Act was placed on the House of Commons agenda in the name of Prime Minister King.

This will give opportunity for the parliamentary discussion on power export, promised by Mr. King last December.

It is understood the purpose of the measure will be to require that licenses for the export of power may be granted only by parliament. Under the present act the governor-in-council may grant such licenses.

Several months ago when Premier Hepburn of Ontario approached the Dominion government for a license to export power from Ontario to United States, Mr. King and his colleagues decided no further licenses would be granted until there had been an expression of the will of parliament on power export.

Storm In Cape Breton

Sydney, N.S.—Cape Breton Island was in the throes of the heaviest storm in five years as a 42-mile gale whipped snow into huge drifts.

Invitation Accepted

King George And Queen Elizabeth To Visit France This Summer

London.—The king and queen will visit France for four days this summer, marking the first state visit by their majesties to a foreign country since their accession.

"The king and queen have accepted with much pleasure an invitation from the president of the French republic to pay a state visit to Paris from June 28 to July 1. During his stay the king will unveil the Australian national war memorial at Villers-Bretonneux."

In making the unveiling the king will be following the example of his brother, the Duke of Windsor, who as King Edward VIII. went to France to unveil the Canadian memorial at Vimy ridge on July 26, 1936.

As the Duke and Duchess of York the king and queen twice visited Paris—in July, 1931, for the Colonial exposition, and again in November, 1935, on the occasion of the annual dinner given by the Caledonian Society of France. Both speak fluent French.

Dakota Farmers Need Loan

Willing To Try Again For Crop If Seed Purchased

Crosby, N.D.—Farmers of a drought-ridden five county area in northwestern North Dakota would gamble their labor against the elements again this year if the government provided a stake of close to \$2,000,000 for seed and protection loans.

C. H. Lockrem, district supervisor for the Farm Security Administration, estimated at least four out of five farmers in the area would need loans of \$300 each to purchase seed, tractor fuel or feed for horses.

"If moisture comes and the pests don't get us, we'll make a crop," the farmers say.

SEES RETURN OF GOOD CROPS WITH NORMAL RAINFALL

Ottawa.—The only thing wrong with Saskatchewan drought area was lack of rain, said Dr. Thomas Donnelly (Lib., Wood Mountain) during the throne speech debate in the House of Commons. He protested against statements made in different circles to the effect conditions in the dry sections of the prairies were due to farming methods.

The drought area was not confined to Canada. It spread over many states of the American union and extended into Mexico. Last year the area was restricted on the edges as compared with previous years, but the drought in the centre of the area became more intense than ever before. There was practically no growth at all.

Dr. Donnelly said all signs pointed to a further restriction of the area next year. It appeared the country was gradually coming back to conditions of normal rainfall and normal production.

Most of the farmers in the drought area had settled there with no worldly goods, he explained. Over a period of 20 years they had enjoyed reasonably good crops and many of them had built up assets of \$10,000 to \$20,000. It was impossible to ask those men, now 40 to 65 years old, to leave their homes and the land they knew would produce crops if rain came and carve out new homes for themselves elsewhere. They would not do it.

"I would like to say this to the government," he said. "It is justified in helping the old settlers remain on the land, but it is not justified in helping young men settle or start farming there. Young men should be encouraged to go elsewhere and start farming where prospects are better."

Dr. Donnelly said the old settlers had faith in the land and he shared it. There would be rains there again and there would be good crops again. Since the Saskatchewan last fall and early winter because feed was not shipped to the drought area, soon enough, it was charged by E. E. Perley (Cons., Qu'Appelle). He blamed the federal government.

In some sections of Saskatchewan 30 per cent. of the horses were reported dead or dying from starvation early in January, Mr. Perley said. Some farmers charged the Saskatchewan government with deliberately stalling in feed payments to save interest, he said.

Mr. Perley favored a control board for the western wheat industry. There should be control boards for railways, radio, power and various other industries and he could see no objection to a grain control board.

ROUMANIA NOW UNDER A VIRTUAL DICTATORSHIP

Bucharest.—Dr. Miron Cristea, patriarch of the Rumanian Orthodox Church, became premier of Rumania after the anti-Semitic cabinet of Premier Octavian Goga resigned. The 68-year-old church head, who at first refused King Carol's plea to take over the government, formed a cabinet of Centre and Liberal orientation which will rule without parliament.

He became a virtual dictator. Special parliamentary elections, scheduled for March 2, were cancelled and all party activities were suspended temporarily. The constitution was placed in abeyance.

Pending the formulation of a new constitution the government will be ruled by decree.

Dr. Cristea's cabinet, which included seven former premiers, took its oath of allegiance before the king. Among those reported to have accepted portfolios in Rumania's rapidly changing regime were:

George Mironescu, a leader of the National Peasant party; George Tataracescu, head of the Liberal party; Alexandru Vaidavovod, head of the Nationalist party; Alexandru Averescu, leader of the People's party; Nicholas Jorga and General Vintila, all former heads of the Rumanian government.

Goga was reported to have declined offer of a post, saying he wanted to travel abroad.

Julian Maniu, powerful leader of the National Peasant party, was understood not to be in the cabinet though he had been offered a post, but had earlier assured Carol he would support a coalition government.

Carol prevailed upon the patriarch to reconsider his initial refusal to head the regime when Dr. Cristea was informed 64-year-old Mironescu, three times premier, had a list of ministers practically ready.

Collapse of Goga's government, brought on by his pro-Fascist program and an economic recession during his six weeks in office, occasioned little regret in Rumania.

After presenting his resignation to Carol at the palace, Goga told his ministers "the Jews have defeated me." Economics and anti-Semitism were considered reasons of equal importance for the Goga downfall. Since Goga took office Dec. 28, 1937, stock exchange shares have fallen as much as 20 per cent.

Goga's plans to increase taxes caused sales to drop and capital to flee the country. Jews and Christians alike refused to start new enterprises. The cost of living rose but prices to farmers dropped.

Fighting Ice And Storms

Soviet Plans For Rescue Of Scientists Being Rushed

Moscow.—A drab disaster costing 13 lives accentuated hazards of the Arctic as Soviet rescuers battled ice and storms in a struggle to aid four scientists imperiled on a drifting ice floe.

Undeterred by the crash of the semi-rigid V8 on a test flight while preparing to aid the stranded scientists from the air, the Soviet government pushed forward with plans for aeroplane relief if ice breakers cannot reach them in time.

Main hope of saving the scientists before the floe might be crushed in the ice fields on the Greenland area lay in the four ice breakers of the rescue expedition. These ships carry eight specially-equipped planes.

British Aircraft

Heavy Machine Guns On American Design Are Being Installed

London.—Sir Thomas Inskip, minister for defence co-ordination, told the House of Commons a heavy machine gun of American design is being installed in British aircraft under the replacement program and an interim order for such guns has been placed in the United States.

Sir Thomas declared arrangements had been made for the production of such heavy machine guns from British factories but it had been found impossible to meet the requirements of the stepped-up program. Production, however, was now proceeding satisfactorily in British factories.

Italian Plane Wrecked

Le Bourget, France.—A big Italian plane flying to London to attempt to set a new London-Cape Town record crashed on landing here. Pilot Gianni Albertini, his wireless operator and a mechanic escaped injury. The plane was wrecked.

Our Village And Its Welfare

Perhaps too much mention of the fact that certain things are lacking in this Village of ours makes us feel as if our council is inclined to lie down on the job. This is not our conception, we feel that we would like to help our Council and Board of Trade in the many valuable projects they have undertaken.

At times we are prone to rest our own minds, and leave all the hard work to the leaders of the different organizations instead of lending a hand. If we really want our Village to continue to be outstanding, we must put our shoulder to the wheel and help the drivers.

Someone may say, "Suppose we have a fire; will we be able to extinguish it with the present fire-fighting equipment?" This answer is yes, and no. Why? In the first place, the two chemical engines we have are in perfect condition, but shortage of funds holds back the purchasing of a motor vehicle for their transportation. This is now being looked after. We are informed that the council has asked the Dramatic Society to help by donating a portion of the proceeds of a play, which will be held in the near future. We congratulate the members of this society who are helping to make this possible, and we are sure of success.

Undoubtedly, many have said, "Where is our Board of Trade, and what will be done with the C. P. R. lot which has been worked so as to eliminate the growth of weeds and grass?"

Our Board has not met for some time, in fact, the date of the annual meeting has gone by, and we see or hear nothing of its proceedings. Why?

No one wants to see 1938 without a Board of Trade in Crossfield. It is our wish that a meeting be called to get things lined up and start work again. Why not finish the beautifying of the C.P.R. lot just as a suggestion, it may be well to arrange a day and have a number of local men assist with the planting of trees, etc. This would save expense and perhaps create interest in the beauty of main street.

Come on, folks, all we need is to put our heads together, our shoulders to the wheels and roll the carriage of prosperity through Crossfield. We can do it. LET'S GO.

Tomorrow may come,
Today is here now.
We'll be on the run
And win somehow.

The World of Wheat

By H. G. L. Strange
Director "Crop Testing Plan."

"We are fortunate indeed in Canada in having a splendid Dominion Governmental system for the control of the grades and standards of our seed and commercial grains."

This is what I told myself on my return from a recent visit to several parts of the United States. Each State there I found controls its own seed standards, which vary greatly. There is no Federal control over seed, and there is no licensing (continued on column 3)

Way Seen to Peace in China

SAN ANTONIO, Texas.—The Japanese conflict in China could be stopped within a few months if the English-speaking nations were willing to forego the material profits of war, said Alfred Edwards of London, member of the British Parliament, in an address here, January 27th. Unless English-speaking peoples did stand unitedly for peace there might come war that would more than wipe out the accumulated profits, he added.

Mr. Edwards' Laborite who represents Middlesbrough in the House of Commons, was one of four speakers from as many countries at an Institute of International Relations held here under Rotary Club auspices. Others were, Maurice Duperrey of Paris; I. B. Sutton of Tampico, Mexico, and Allen D. Albert of Chicago. M. Duperrey is president of Rotary International. Messrs Sutton and Albert both are past presidents.

U. S. Moves Cited

Mr. Edwards, declaring that the English speaking countries—notably Great Britain and the United States—were more powerful and wealthier than the rest of the world said there would be peace when the other nations were convinced "we are in unity for peace".

He sought to show that the United States, despite its so-called aloofness from the League of Nations, actually did not oppose what the League stood for. He emphasized that the United States had taken the lead in various world crises, and has even proposed to go further than League members in behalf of peace. He cited the Japanese invasion of Ethiopia, and more recent events that led to the call for the nine-power conference at Brussels.

M. Duperrey told how Rotary throughout the world had found bases for friendship among national racial and religious antagonists and was carrying on in its efforts to promote good will even in midst of international conflict.

How Mohammedans, Jews, and Christians rub elbows as friendly fellow Rotarians in Palestine was related by M. Duperrey in describing the Rotary Club of Jaffa-Tel Aviv. Jaffa is peopled mainly by Arabs and Europeans; its twin city, Tel-Aviv, is wholly Jewish. Instead of forming two clubs that would have accentuated differences between the two communities, Rotarians spent three years in perfecting one organization to draw all elements together.

Relief by Tokyo Club

The International President told of responses of the Rotary Club in Tokyo to relief appeals from Shanghai and Tientsin, China. He recalled that Rotarians of Argentina and Uruguay, when relations between the two countries were strained, effected an exchange of sons of Rotarians during vacation time to relieve the tension. He described a ceremony on the border of Chile and Peru where clubs of Arica and Tanna, after the end of the famous territorial dispute involving them, inscribed on a monument named "Concordia" a pledge of enduring friendship.

In Middle Asia in April will be held a Rotary regional conference to bring together Rotarians of three different races and nearly a score

of nationalities. Rotary families of the Netherlands and Belgium exchange week-end visits. Baltic countries have their own periodic Rotary conferences, and some of the highest officials of those nations are active Rotarians.

—Christian Science Monitor

The World of Wheat

(continued from first column)
of varieties, so there is some confusion.

The United States' Federal control over commercial grain grades is nothing like as exacting as is the Dominion control in Canada, the consequence of it all being that World buyers have not the same confidence in United States' grains as they have in Canadian stocks.

The reason for the World's confidence in Canadian grain and seed rests primarily in the high standards required by the Canada Grain Act and the Canada Seeds Act.

These Acts are administered, respectively, by the highly competent officers and officials of the Board of Grain Commissioners and of the Dominion Seed Branch. Because these officials are strictly impartial and are not subjected to any political pressure, they have the confidence of the producers, merchants and consumers alike.

I found in the United States that our Canadian system drew warm tributes from all American agriculturists.

What Purposes do Life Insurance Premiums Serve?

Answer.—They provide your dependants a guaranteed sum in the event of your death—or provide money for your old age.

Question.—What is done with the premiums you pay?

Answer.—The savings which you put into Life Insurance are combined with those of other policyholders and are carefully invested in the best interests of all policyholders.

Q.—What is the guarantee back of these invested funds?

A.—The security of the individual loans, in addition to the integrity of the borrowers—whether governments, corporations, or individuals.

Q.—Why are premiums called savings?

A.—Because, year after year, they build up the fund out of which payments to policyholders and beneficiaries are made.

Q.—How much of this money is paid out to policyholders and beneficiaries in Canada?

A.—Half a Million Dollars every business day.

This is the second of a series of messages sponsored by Life Insurance Companies operating in Canada. The third, to appear in two weeks' time, will discuss Life Insurance assets.

TRADITION

Science advances . . . time progresses . . . engineering skill dictates a streamlined age . . . changes are taking place in our old traditions and methods.

But there remains one process, that because of its traditions, becomes increasingly popular . . . more valuable to our well being than ever before.

Each year adds to its charm, yes and quality . . . a quality that time and science cannot take away, and that process? The "traditional formula" used by the Brewing Industry of Alberta in the manufacturing of ALBERTA BEERS.

the BREWING INDUSTRY of ALBERTA
"BEERS THAT ARE BEST"

Evidence Would Indicate That Great Britain Will Be Ready Should War Come

Evidence continues to accumulate that Great Britain, while in no sense seeking war, is certainly rushing her way to effective preparedness, should war come. The new fortifications at Cyprus; the strengthening of the air base at Alexandria and of the protection of the Suez Canal; the notable additions to the air force at Singapore and the establishment there of the most powerful mobile heavy gun batteries in the world today, so far as is known; the plan—officially confirmed in London cables—to establish a strong naval and air base at the port of Freeport in the West African colony of Sierra Leone; the huge undertaking at Capetown in the east of which Britain is sharing; and the additional warships ordered and above those already planned, envisaged in the speech of Sir Thomas Inskip a little while ago—there are some of the concrete proofs that the British Government is not only alert to the critical nature of the general international situation but has no intention of being caught napping by any other Power any where at any time.

Rumors continue to keep the cables busy. The latest credits Mussolini with having indicated that there would be big things doing in March in connection with which he is reported to have referred to the alleged superiority of the Italian Fleet in the Mediterranean over British naval power. But it is quite on the cards that Mussolini may be reckoning without his host. Already a realignment of British sea-power has resulted in the shifting of some of Britain's newest rebuilt battleships into the Mediterranean, and it is reported on good authority that there are more to follow. The whole point of this is that Britain is the only Power which has been reconstructing upon a gigantic scale and that most of this work of reconstruction is now complete or will be within a very short time. These new reconstructed battleships and cruisers are much more modern and much more powerful than those still in commission but not yet outmoded.

Now comes news from London that within one year Britain counts upon possessing a fleet of ten thousand military airplanes—which would give her an air force more than equal to those of Germany, Italy and Japan, on the basis of the latest available estimates. Already Britain has 1,560 first-line airplanes, which is only 180 short of the number she should have to-day under the rearmament programme. Work in being speeded up weekly. Behind this first line she has a force the real strength of which has never been made public. Now this strength, it is said, will be six reserve planes for each first-line plane within a year; and as these reserves are just the same planes as the first line, that would give Britain a total air force of 12,220 planes within the twelvemonth.

Consider these facts in addition to the recent army commands shake-up, the complete mechanization of the army, and the plans for improving enlistment in all three forces—plans which are having distinctly encouraging results—and it is not difficult to perceive that Britain is thoroughly aroused and is moving with all possible speed to be in an assured position to meet any attacks that may be made.—Montreal Star.

Oil From Grapstones

Chemists in Germany Say It Is Commercial Possibility

Oil from grapstones is the latest achievement claimed by modern German chemists who have already produced wood from fish, cork mats from potato peelings, and suits from straw.

Experts attached to the Rhineland wine industry have for several months been seeking means of using up the stones and skins left after the grapes have been crushed, and they now announce that oil production has become a commercial possibility. Already it is stated over 40,000 litres of oil have been derived from the stones alone, and as the process is developed it is hoped to produce 1,000,000 litres a year of fine-grained grape-stone oil.

"Come in, George," said the Master of the house. "He won't touch you. You know a barking dog never bites." "Yes, I know that," came the reply. "But does the dog know it?"

Stores in Buenos Aires, Argentina, are being air conditioned.

In Burma, talking is regarded as a fine art.

For The Woman Investor

Some Hints Which Should Be Very Carefully Followed

Statistics show that much of the capital of the world is held by women, who have inherited it from fathers or husbands. To invest this wisely, that it will not be lost and will bring in a steady income, is very difficult for the woman who has been shielded by her gallant males from financial worries, as well as from the knowledge and experience which she sorely needs later.

One of the first financial axioms is: "Don't carry all your eggs in one basket." Diversify your investments. Thus you distribute your risk. You are not likely to lose along all lines, even if one should "go bad." Diversity of investments is not enough. Each investment should be carefully studied and found secure. Invest in growing industries, not in things which may soon be out of date, as carriages or chums.

Do not buy on too narrow a margin. If you own only a small per cent. of a bond, you may have to sell when hard times come and so will lose money on the deal. If you own the entire bond, or most of it, you can hold it until it returns to face value and have lost nothing. It is risky to invest money in foreign countries, since a war or changed laws may make your holding worthless.

Before you sign away any of your money or your rights, or make a contract, read over every word of the agreement carefully and be sure that you understand what it means. It is even wise to consult a reliable lawyer about the advisability of such a move. Have everything down "in black and white," as that is good business sense.

Process Is Complicated

Laboratory Workers Find Lipstick Is Hard To Make

Have you any idea of the complicated processes that go to make beauty preparations?

Lipstick, for instance, of which a large factory can turn out several hundredweight a week, is a complex mixture. Lipstick is temperamental stuff to make, laboratories will tell you. It may be blended to the exact formula and heated for the right time at the right temperature, and then it will come out very slightly different in color or consistency—and there is nothing to do but throw it away and start again.

When the mixture is just as they want it, they pour it into a metal mould with perhaps twenty holes. The mould uncovers into halves, leaving 20 lipsticks. It's a slow, delicate business, and the dyes, in powder form, have to be indestructible and will stick to anyone working on them.—Overseas Daily Mail.

Just What He Said

Dealer Played Safe In Recommending Horse To Purchaser

The deal was just being brought to a close.

"He appears to be the kind of horse I want," said the purchaser.

"Yes, he is a fine-looking horse," the vendor answered.

"And he's a good worker?"

"When you see 'im at work you will be delighted with 'im."

The horse changed owners.

A week later a heated argument was being waged between the same two men.

"And you had the cheek to tell me he was a good worker! Why, 'e couldn't pull a hen off its nest!" "I never told you nothing of the sort. Wot I said was—when you see 'im at work you'll be delighted with 'im—an' so you will!"

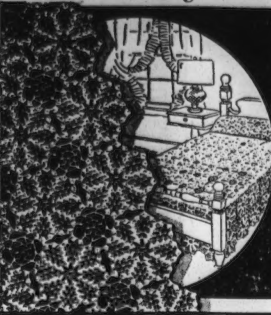

The forest measuring worm, when alarmed, will stand out so straight and still from a limb that even the birds think him a small twig and pass him by.

Having found on the doorstep of the universe a star almost as big as our solar system, Yerkes observatory astronomers plan to leave it there.

The term cowboy first was used during the American Revolution and was applied to a band of Tories who stole cattle from both sides.

The toad is toothless, but frogs have teeth.

Crochet Then Join Medallions for Cloth Scarf or Pillow Top

PATTERN 6039

Your hook acts like a magic wand as you crochet these exquisite medallions in string. They count up so quickly, you'll have enough to sew together for a beautiful spread, cloth, scarf or pillow before you know it. They measure 7½ and 2½ inches in string—smaller in finer cotton. In pattern 6039 you will find complete instructions for making the medallions shown; an illustration of them and of all stitches used; a photograph of the medallions; material requirements.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Exercised Their Rights

Grenadier Guards Marched Through London With Bayonets Fixed

The steamship Dunera arrived at Southampton recently with the Second Battalion, Grenadier Guards, from Egypt, and the First Battalion, the Duke of Wellington's Regiment, from Malta.

The Second Battalion, Grenadier Guards, exercised its ancient right of marching through the City of London with bayonets fixed, drums beating, and Colours flying. In accordance with custom the City Marshal (Commander J. B. Poland) challenged the battalion at the city boundary, and on the commanding officer replying, "The Second Battalion, Grenadier Guards, exercising their ancient privilege and right to enter the City of London with Colours flying, drums beating and bayonets fixed," the Marshal replied: "I have it on the authority of the Lord Mayor, to receive and attend your regiment through the city."

The City Marshal escorted the battalion through the city, and the Lord Mayor took the salute from the balcony of the Mansion House.—London Times.

"We have everything on the menu to-day, sir," the waitress said. "So I see," the customer said. "How about a clean one?"

An apparatus at Harvard University presses water into five different solid forms and can squeeze air into a substance as dense as water.

Halibutones in a summer storm recently killed two hundred sheep at Wolweruit, South Africa.

Appreciated In India

Air-Conditioned Train Will Make Travelling More Enjoyable

Train travel in India is notoriously unpleasant. The winter conditions our railways have to contend are reversed as India fights excessive heat. But another indication of new India in the fact that the first air-conditioned train recently made a demonstration run from Delhi to Agra and back. Four coaches were used for the journey which was a revelation to those on board of modern methods of travel and comfort for passengers in that hot country. The air-conditioning equipment made it possible to maintain a steady temperature inside the carriages, the air being renewed every four minutes. Each coach accommodates fourteen first class passengers, being divided into five two-berth compartments and one four-berth compartment. It is proposed to attach an air-conditioned coach to each mail train between Howrah and Bombay via Chhokri.—Brandon Sun.

Fish Eats Water Fleas

Supply Sent Daily To Buckingham Palace For Aquarium

Fleas go to Buckingham Palace every day but they don't bite anyone. They are specially bred food for fish in the royal aquarium.

A tropical fish expert drives into the palace courtyard with a small black bag containing a supply of water fleas. For easier handling they are semi-frozen on glass trays.

When dropped into the water, they come to life and give the fish some exercise—if not snapped up first.

Midget Engine Conveys Honor Key To Rail Chief

A SPECIAL railway line was set up by the Halifax Board of Trade recently by which Mayor Walter Mitchell presented a golden key to the City of Halifax to S. J. Hungerford, Chairman and President, Canadian National Railway System, on the occasion of his annual banquet of the Halifax Board of Trade, at which Mr. Hungerford was guest speaker. The track was laid along the head table and Mayor Mitchell, after making the presentation speech, placed the key on the tender of a miniature Canadian National locomotive which conveyed it along the rail and stopped in front of Mr. Hungerford. The picture shows the President of the National Railway System receiving the key. Among those present at the inauguration of this unique rail service were Hon. Robert Innes, Lieutenant-Governor of Nova Scotia, Premier Angus L. Macdonald and Frank K. Warren, President of the Board of Trade, who presided.

Knowledge of Buttermaking Gained From Research Work Presented to Association

Under the title of "Newer Knowledge of Buttermaking," Dr. E. G. Hood, Chief, Division of Dairy Research, Dominion Department of Agriculture, presented an important paper at the convention of the Manufacturers' Association. All the high points in butter research throughout the world for the past five years, summarized from the results of investigational work carried out in the main butter producing countries, were dealt with in the paper, including contributions from dairy research institutions in New Zealand, Australia, United States, South Africa, Germany, Denmark, Ireland, Great Britain, Sweden, and Canada.

For the purpose of presentation, the subjects under review were arranged under the following sub-heads: Neutralization; Workmanship; Wash Water; Packing; Storage and Keeping Quality; Defects; Standardization of Composition; and Laboratory Control. The main object in presenting a subject of this character, stated Dr. Hood, was to give some insight into a few of the major problems under consideration in the main butter producing countries of the world and point them out to butter-makers who have not the time nor access to the dairy literature. In addition to that, it seemed desirable to stress upon the practical man the importance of the scientific side of buttermaking, and that effort and expense have not been spared by the scientist in solving problems concerning the practical work of the dairyman of Canada. While it was generally recognized that good butter could be made even with the knowledge of to-day, many of the why's and wherefore's still remained mysterious and awaited logical explanations on a scientific basis. It was also apparent, continued Dr. Hood, that if progress were to continue and improvements in quality and method be made in buttermaking, as in other fields of industry, experimentation must continue, and the findings of such work must eventually be applied to every day practices.

Under the sub-heading of workmanship, recommendations are made in the manufacture of winter butter from butterfat with a low iodine number, and also in the manufacture of summer butter. In the case of the latter, the recommendations are three in number, namely (1) since the body of summer butter is normally soft, a relatively high wash water temperature should be used. Though wash water with a temperature as high as 60 degrees F. will increase the firmness of butter, wash water of this warmth will reduce the standing-up properties of the butter. Under the heading of the optimum temperature of the wash water will be about 50 degrees F. (2) The cream should be cooled to, and held at, as low a temperature as is practical. Cooling the cream to a low temperature will increase the firmness of the butter and also increase its standing-up properties. (3) The cream should be churned at as low a temperature as is practical. The lower the churning temperature, the firmer the butter.

With regard to packing, liners and boxes, heavy financial losses have been incurred by butter manufacturers in many countries by wood taint, surface flavours, and high colour. To overcome these difficulties, much attention has been given to this subject, particularly in New Zealand, Australia and Canada. Experiments recently conducted by the Dairy Research Institute of New Zealand show that great benefits can be secured from the use of a new butter-wrapping material, triple foil parchment, which is a sheet of aluminum foil, sandwiched between two sheets of parchment paper. Results of New Zealand experiment have been paralleled in Australia. On the basis of the findings of these two countries, it appears as if this new type of butter wrap will eventually allow countries far distant from England to land their butter into store there in the same condition as the freshly made butter forwarded more quickly from the close continental countries. Experiments in Canada conducted by Hood and White with the triple aluminum foil wrap further confirm the results obtained in New Zealand and Australia. The casing-formaldehyde spray method of Wiley for the treatment of butter boxes to overcome wood taint has met with considerable success in Australia. An adaptation of the method has been made by Hood and White to Canadian butter box manufacture. While its use has been limited to Western Canada, marked

improvements have been found in the surface quality in the butter as compared with the older method of packing.

Numerous other papers are to be found in the literature on the wrapping of butter. These include studies on the chemical and mechanical properties of parchment paper, mould development, methods of sterilization, specially treated papers to exclude certain light rays, and the influence of the wrapper on the auto-oxidation of butter fat.

In summarizing the activities of the main butter producing countries of the world, concludes Dr. Hood, there appears to be ample evidence to show that the industry is progressively advancing, but as yet many problems remain unsolved. Aside from the questions involved in the procurement of high quality cream, further scientific knowledge is needed in the fields of its structure, microbiology, and chemical composition, as well as its nutritional aspects, before the full benefits can be derived by the industry.

Empire's First Tapioca Plant

Will Be Erected In Honduras On Site Called Canada Hill

A. Reg. Timms, contractor of Wexford, Ont., has left for British Honduras to supervise and act in a consulting capacity in connection with the erection of building and installation of machinery for what will be the only factory in the British Empire manufacturing commercial tapioca starch from the cassava root. The site of the pioneer factory has been named "Canada Hill."

The development of this industry has its origin two years ago, at that time two young men, George Patterson of Toronto and Bill Murray of Montreal, conceived the idea that somewhere in the British Empire there was a location suitable for the production of cassava roots and determined to find that location.

There followed months of investigation of possibilities throughout the Empire and they found a hidden valley in the British Honduras where the cassava tree could not only be grown profitably but where the production of starch per acre was as high and higher than the East Indies.

The organization of Empire Starch Products, Limited, and the support of the British Colonial Office and the Agricultural Board of British Honduras followed.

The Government of Honduras agreed to construct wharfare, docks and a 26-mile road from the sea coast to the valley, on the condition that the company produce a satisfactory financial set-up.

The British Government has voted \$25,000 toward provision of a suitable road and the construction of the road which follows for a great part of the way an abandoned narrow-gauge railway bed which had been used for taking out teak-wood and other hard woods from the interior.

A Great Trading Post

Colony Of Hong Kong Is Administered By British Governor

Hong Kong is virtually as British as Newfoundland. The colony is administered by a British governor with an executive council. It is one of the world's great trading ports. As well as the British city of Victoria on the island of Hong Kong, the suburb of Kowloon on the mainland is under the British flag. Additional territory further inland toward Canton has also been leased from China. Whether Japan can strike at Canton without also making war on the British colony of Hong Kong may be demonstrated in the next few months. It is incredible that it would be British policy to allow Hong Kong to go the same way as Shanghai—Ottawa Citizen.

Fish Bites South African Native And His Dog

By biting a native and his dog near Mombasa, South Africa, a fish routed them and escaped at its leisure. The man was cornering and catching tiny swimmers which had been left in a pool by the receding tide. The dog entered the water, but was immediately slipped by the cornered fish and fled. When the native tried to grab it he was attacked and bitten on the hand. The man was treated at a hospital. The fish escaped when the tide rose.

ALICE STEVENS' RECIPES

GOOD BOOKS AND PICTURES HELP CHILD'S DEVELOPMENT

A two-year-old child usually enjoys picture-books and the simplest story books about objects and events in his every-day life. He likes books about airplanes, engines, cars, boats and children.

A four-year-old child still likes picture books but he is hungry for stories, stories of his immediate experiences such as the working of the concrete mixer where the new sidewalk is being laid or the freezing of the ice-cream for supper.

A seven, eight or nine-year-old accepts and enjoys fairy tales and also true stories that have vigor and achievement. At this age, he usually knows that in the real world beasts do not talk and gingerbread boys do not jump out of the pan and run away.

Children's books should be beautifully written and illustrated and attractive as to paper, print and binding. They should be substantial enough to stand the wear and tear of handling.

Pictures of animals, of children, of Madonnas and pictures which tell a story are enjoyed by children as permanent pictures.

Add corn syrup to candy to prevent it going grainy.

Use very few spices and flavorings in cooking apples. Try to develop the natural flavor of the apples.

One teaspoon soda and two teaspoons cream of tartar equal four teaspoons baking powder.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 115 McDermott Ave. E., Winnipeg, Man.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

Continuing the story of Island Falls, where the electric power comes from.

The thing that interested me, however, was the consuming of the wild, the erection of 356 steel towers carrying power 60 miles, and the line patrolmen who live with their families at mile 13 and mile 38. These men walk steadily, examining the conditions of wires, posts, possible dangerous fires, etc., and report by telephone from one of the eight telephones on the route. Occasionally they can hitch-hike a ride on a boat going down the lakes and walk back. At mile 13 a wood pole, single circuit, aluminum cable line 40 miles long tapers off through air-brake switches to feed the Sherford-Gordon mines.

I asked the patrolmen, both of whom I met by good luck if they weren't lonely, but mile 13 is close enough to Flin Flon to have visitors, and at mile 38 they are lonely only in summer, while in winter they feed themselves twice a day—men hauling supplies to Island Falls over the ice.

This supply business is mighty important because you can't run down to the corner store for something forgotten, and you must have a year's supply on hand at all times.

In winter, then, about 200 tons, valued at \$30,000 to \$50,000 of stock and provisions are hauled in and stored in warehouses for non-perishable food stuffs. There is a heated building for the storage of frozen foods, and an ammonia refrigerating plant maintains cold storage for packing house provisions.

Believe me, I ate beef in July that had been brought in the previous December and it was better than you'd buy in the city, because every chop, roast, chicken, etc., is government-inspected then wrapped separately in Collophane, quick frozen and kept that way till the housewife gets it.

The company store is excellently laid out, and carries every good branded line of drugs, cosmetics, canned goods, silk stockings, etc., and marvelous to relate, sells at less than city prices, despite the cost of hauling and storage.

Some part of the stock consisted of unknown lines to me, but was for trading with the Indians a town of a Cross (Roman Catholics) being established on the mainland three miles away, whose men folk do logging and brush work around the properties. There are about 30 employed, and who are entitled to buy at the company store at the same prices the white residents pay. This is some difference to the way it used to be when the Indian was fair game for the white trader. However, all through my studies I was deeply impressed with how the company went out of their way to treat employees fairly, and with the satisfaction expressed by the men and women workers both here and in Flin Flon.

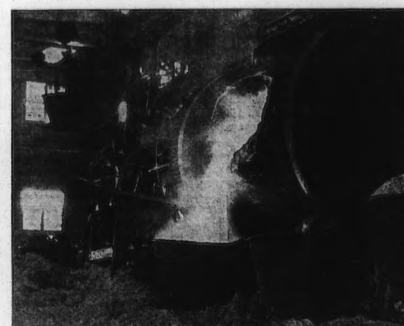

Getting up to Island Falls from Flin Flon was easy. I took a taxi to Channing flying field, six miles out, stepped into an Arrow Airways plane with Jeff Home-Hay as pilot and in 40 minutes descended on the water at the dam and taxied to the wharf. Getting back I wanted to see the water route, so started out at 8:45 a.m. from the store where all the passengers gather and walked to Sandway Bay. There, outboard motors were placed on two canoes, across Sandy Bay, 8 1/2 miles to a half mile portage at Muddy Lake, where a Linn tractor pulled a wagon with the freight, and passengers walked.

Built Big German Gun

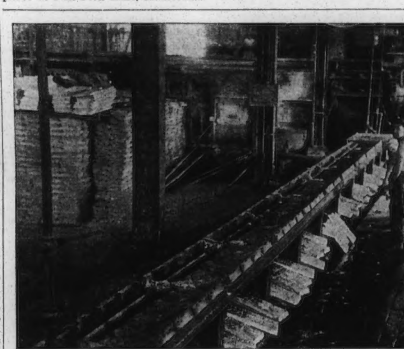

Oswald Dimroser, 63, university professor and engineer who constructed "Big Bertha" the heaviest of Great War fame, died recently in Baden, Austria. Big Bertha was the nickname of the German long-range gun, manufactured by the Krupp Arms Works, which in 1918 created a sensation by shelling Paris from the Forest of Comy, at a range of 76 miles.

Molten zinc being poured into molds at Flin Flon. Man at right is leveling floor. In left background are these 60-lb. zinc bars cooling off.

This is molten copper pouring from smelter converter. It will be carried from here by the overhead trolley to the casting machine. 1887 photo at Flin Flon mine, Manitoba.

Zinc slabs, glowing with heat, dumped from the molds. Men with long grab them one at a time and swing twenty onto a truck at Flin Flon.

The coconut palm, second most valuable tree in the world, originated in the Malay Archipelago. It has been cultivated for at least 3,000 years. The coconut and its kernel are its chief products.

"Did you say pills, miss?" the chemist asked the little girl. "Yes, please." "Antibillous?" "No, but uncle is."

Every Newar girl of India is compelled to be "married" to the native bull so that she will never be left a widow.

Chief of Amateur Fire Brigade:

"You're late in getting here."

Young Fireman: "I live a long way away."

"That's no excuse. In future you must live nearer the scene of the fire."

A new German commercial airplane for 26 passengers is pronounced so safe that no lifebelts for passengers are necessary.

The catch on more than 2,134, 700 lobster traps in use on Canada's coast last year had a marked value of almost \$4,383,500.

SCENES AT RE-OPENING OF GENERAL MOTORS REGINA PLANT

Interesting ceremonies marked the re-opening of the \$2,200,000 Western plant of General Motors of Canada Limited at Regina recently when provincial and civic leaders joined in welcoming General Motors executives. The above illustrations show, upper row, from left to right, the assembly line in the plant following completion of the \$2,200,000 modernization program; centre, the first 1938 car, a Chevrolet coach, made at the Regina factory. The keys of the car were turned over to Hon. A. P. McNab, Lieutenant-Governor of Saskatchewan, by Harry J. Carmichael, vice-president and general manager of General Motors. His Honor then presented them to Mr. Justice W. M. Martin, president of the Saskatchewan Division of the Red Cross. In the foreground beside the car are Mr. Carmichael, Mr. Justice Martin and Mr. Justice Mackenzie. Another factory operation is shown in the third picture. Lower row portrays, first, a group of workmen; centre, a scene at the Board of Trade dinner, the group comprising, from left to right, L. A. Thornton, president of the Regina Board of Trade; C. E. McTavish, general manager, General Motors Products of Canada Limited; Premier W. J. Patterson of Saskatchewan; and His Honor A. P. McNab. The third picture shows J. B. Highfield, general plant manager, General Motors, being interviewed during the broadcast of the proceedings.

The Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

by DR. J. W. S. MCCULLOUGH

ARTICLE No. 28

The Cancer Campaign

The campaign against cancer undertaken by the Canadian Medical Association, with the aid of the King's fund, recalls one of the same nature now being carried on in Belgium. In this connection the secretary of, and moving spirit, in the Belgium society for combating cancer, Doctor Schraenen, well-known to many in this country, declares that the object of the campaign in Belgium was to give the best possible treatment to the greatest number of patients at the earliest possible stage of the disease.

"In order to achieve this idea," says Dr. Schraenen, "the following demands must be met: The public should have a basic knowledge of the nature of cancer, know what methods existed for fighting it, and above all, be awakened to the importance of their own co-operation in this struggle. The diagnosis of cancer," he went on to say, "must be so organized that the disease might be recognized as early as possible. Opportunities for suitable early treatment should be assured. For subsequent treatment there must be a service of supervision and also a social cancer welfare organization devoted to the economic and psychological consequences of cancer for the patient and his family."

Dr. Schraenen pointed out that the measures required were the special scientific training of medical students in relation to cancer; a constant re-awakening of interest among practicing physicians, by means of courses on the subject, by post-graduate lectures; close co-operation between physicians and anti-cancer centres, in a word, by tackling the practical side of the question.

Belgium is well organized to cope with the cancer plague. The centres for diagnosis and treatment of cancer are among the best to be found in Europe. The organization for preventive work is not surpassed anywhere. In every phase of effort against cancer Canada can learn something from the heroic little Kingdom on the North Sea.

Next article: Cancer of the Rectum.

SUNDAY SCHOOL LESSON

FEBRUARY 20

CHOOSING COMPANIONS IN SERVICE

Golden text: For whosoever shall do the will of God, the same is my brother. Mark 3:35.

Lesson: Mark 3:17-19, 31-35.

Devotional reading: Isaiah 65:1-11.

Explanations and Comments

Increasing Popularity of Jesus. Mark 3:12. Jesus and his disciples withdrew to the Sea of Galilee where great crowds sought him, coming not only from Galilee but from Judea and even from Idumea and other sections east of the Jordan and from the region about Tyre and Sidon on the Phœnician sea-coast, all drawn to him by the fame of his deeds of healing and exorcism. So eager were the importunate people to touch him (for they believed that a touch would heal) that he was forced to escape from the shore in a boat.

The Settling Apart of Twelve as Companions in Service. Mark 3:13-19. The time had come for Jesus to have a definite body of men about him whom he could teach and prepare to carry on his mission. It was somewhere on the north shore of the Sea of Galilee and the lake side, that Jesus gathered together the men whom he had chosen. "That they might be with him, and that he might send them forth to preach, and to have authority to cast out demons." "Ye did not choose me, I chose you," Jesus told them in that last discourse with them (John 15:16), and appointed you, that ye should go and bear much fruit, and that your fruit should abide."

The Friendship that Excludes All Others. Mark 3:31-35. There came to the man and his brethren and standing without, they sent unto him, calling him. When Jesus was told by a definite body of men around him, his mother and his brethren were without seeking him, he replied, "Who is my mother and my brethren? Then looking about upon those that sat around him, he declared his kinsfolk were those who did his Father's will.

Home-made ICE CREAM
3 pints for less than 20¢

Ingredients—one package Jell-O Ice Cream Powder, one quart half milk, half cream. Work—mix in bowl, put on window sill outside in cold weather, stir two or three times. The whole job will take two minutes of your time. And the ice cream! You'll be proud to say "I made it myself." Grocers sell Jell-O Ice Cream Powder.

JELL-O ICE CREAM POWDER

WHAT HO!

—By—
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER V—Continued

"Please show Mr. Punder out." Punder stood there, looking more bull-like than ever.

"Do you want to be shown out, or thrown out?" said Ernest. "I give you ten seconds to decide which."

He pulled out his dollar watch.

"I'll go," said Punder. "But, mark my words, I'll be back. Hah!"

Ernest jammed his silk hat on his head and strode out of the room, sizzling. When he had gone the earl said, "I didn't take to him very much, did you?"

"Father," said Rosa, "I'm frightened."

"But why, my dear? The boygame man has gone. And did young Ernest beat the lion? I'll say he did. Nice lion-beating, Ernest, my boy."

"But, father," said Rosa, "you don't know Punder."

"We've met."

"You don't realize what a spiteful, ruthless, unscrupulous man he is," she said. "I've heard stories about him. Getting his own way is an obsession with him. Now we've got his back up, and a Punder never forgets. When he says he'll be back, he means he'll be back; and in spite of what our family crest reads, are we really prepared to fight a powerful brute like Punder?"

"Oh, he was bluffing," said the earl.

"No, he wasn't," said Rosa. "He'll be back."

"Let him come," said the earl. "I forgot to ask him how the device they pack stuffed olives in bottles so that all their little red noses press against the glass."

"We've made a cruel error," Rosa said.

"And I'm afraid I'm to blame," said Ernest, who, having discharged his blast of temper, felt a bit empty and apprehensive.

"Nonsense," said the earl. "You made a sporting gesture. I was afraid for a moment you were going through with it."

"So was I," said Rosa.

"But will he do anything, do you think, sir?" asked Ernest.

"He may. Felt us with pickles, or something like that?" said the earl, unperturbed. "But we should worry, what? Are we Bingleys or are we bobolinks?"

CHAPTER VI.

If, for the thing seemed more than possible, Ernest Bingley had awakened to find himself not in a benevolent bed in a castle in Somersetshire but in his own spartan cot in his fowls town, surrounded by odds and ends of owls and others, it would have been a disappointment, but hardly a surprise. For five incredible days he had been master of the domes (at a price); but the castle and those who dwelled therein still had a mirage-like quality for him. Momentarily he expected Lady Rose to turn into a white dove before his bewitched eyes, and fly away. He kept stealing secret glances at the earl to detect signs that that nobleman was becoming a kobold after the protean fashion of the chameleon characters that populate the dream-world. At intervals Ernest indicted on his own person a rather painful pinch, an act which did not go unnoticed by Count or undiscussed in the servants' hall.

"Pinches himself, does he?" commented Mrs. Featherby, as she went about her culinary chores. "Well, that's his privilege. He can pinch himself till he's all over black spots like a leopard, so long as he does not try to pinch me."

"Nevertheless and notwithstanding," said Crump, "I consider such conduct unbecoming in a millionaire, if such he be, which I still beg leave

"And women?" asked Mrs. Featherby, with a coy smile.

"And women," replied Crump, returning it with interest.

"Is he an old lag do you think?"

"I don't say he is a criminal," said Mr. Crump, "but I don't say he's a millionaire, either. He hasn't rich ways, and he is not posted on the usages of society."

"Things are different in the States, my sister writes me," said the cook. "Shouldn't wonder if at home he lives in a wigwag."

"I wish—," began Crump, and paused, the wish unuttered.

"Tell me your wish," coaxed the cook.

"Rather not."

"Has it anything to do with me?" she asked, archly.

"No," he said. "I mean we'll take that up later. Just now we are discussing that foreign party. My wish is that he is all he represents himself to be. It could solve a lot of the family's problems, Mrs. Featherby."

"Could it not," said the cook. "I'd rather see almost anybody, even an American, marry that sweet lamb than old Frothyphib the Knuckle-cracker."

"My dear Mrs. Featherby," said Crump, "you have been in service here too short a time to speak in so appallant a fashion of a member of one of our oldest county families."

"But that's what all the servants call him," she said. "And, besides, it is just between you and me, Cecil."

She accompanied her first use of his first name with so coquettish a look that Crump, hardened bachelor that he was, went shrimp-pink. She followed up her advantage.

"You don't like him yourself, Cecil. Own up."

Crump set down his tea-cup.

"My like or dislike of Captain Dug-Cooper is, to him, I daresay, a matter of complete indifference," Crump said. "As a gentleman and a guest in this house he is entitled to receive and does receive from me my best and most respectful services. But," he added, suddenly dropping his drawing-room tone, "between you and me and that rolling-pin, my dear Sylvia, I distrust the big bluster."

"Another cup of tea, Cecil?"

"Thank you so much, Sylvia, but I must decline. Duty calls. But we must have another little chat in the too distant future."

"The pleasure will be mutual, Cecil," she said.

"Till then, Sylvia," said Crump, and with a languishing look, he left her.

"Crump's tour of inspection to see if the dusting had been done diligently took him to the library. At first he did not notice Ernest, sunk in a sofa and ambushed behind a dense book, a history of the past played by sundry stalwart Bingleys in the Wars of the Roses, one of the few tomes about the exploits of his clan with which he was not familiar. Ernest saw Crump, saw a look of indigo woe on a visage which was usually, as Crump expressed as a trout.

"Beg pardon, sir," said Crump. "I was not aware you were here. I thought you were in the potting-shed with his lordship."

"I was there," said Ernest, emerging from the middle ages. "But I'm not there now. I'm here."

He was never at his best with Crump. The butler was invariably polite and obliging, but he had a way of looking askance at Ernest which was most disconcerting. Ernest, by nature as sensitive as a sun-burned poet, suspected that Crump suspected him of skullduggery.

(To Be Continued)

Mistress: "Susan, I saw a man kissing you at the back door last night. Was it the postman or the policeman?"

Susan: "Was it before eight o'clock or after?"

Calcutta, capital of Bengal, India, has a population of more than 1,300,000.

Pewter, in case any one should ask you, is made of tin and lead.

WHEN COLDS BRING

SORE THROAT

Relieves THROAT PAIN RAWNESS

Enters Body Through Stomach and Intestines to Ease Pain

The speed with which "Aspirin" tablets act in relieving the distressing symptoms of colds and accompanying sore throat is utterly amazing—and the treatment is simple and pleasant. This is all you do. Crush and dissolve three "Aspirin" tablets in one-third glass of water. Then gargle with this mixture twice, holding your head well back.

This medicinal gargle will act almost like a local anesthetic on the sore, irritated membrane of your throat. Pain ceases promptly; rawness is relieved.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Statement Is Wrong

Churches Are Not Empty As Many People Assert

A familiar comment in these days is that the churches are empty. Such comment could hardly have been written by anyone who has attended a church service, or even arisen early enough on a Sunday morning to pass by a church and observe the crowds, states the Printed Word, Toronto. People really are going to church, to all kinds of churches. Even places with uncomfortable seats or dull pastors receive their quota.

Attendance at a church service does not necessarily mean that a church is flourishing in the way it should flourish. It does not necessarily mean that the members of the congregation are experiencing a spiritual flux, that they love their fellow man and that they have committed themselves exclusively to good works. But attendance at a church service does indicate that they are wrong who say that the churches are empty.

And if they are wrong on that point, they may also be wrong in their criticism that this is a shallow age, bereft of spiritual emotion. The continual rebuffs to which faith in these days is subjected does not necessarily mean that there is no faith left. Cruelty and downright badness can walk unhindered over much of the world, but that is no clear proof that nothing remains of virtue. It may only prove that man's intellectual deliberations cannot be entirely depended upon to produce solutions to problems.

People who have found that they can put no trust in the Nine Power Treaty and who have found that government management of business does not avoid stock market crashes are apt to delve deeper for their assurances.

Debt is a thing a person runs into but can't get out of faster than a crawl.

Apart from the taxes, it costs money to step on the gas.

Discoverer Of New Worlds

Professor Pickering Was Outstanding Astronomer Of Modern Times

The world has lost one of the greatest explorers of modern times. Prof. William H. Pickering, few have heard of Pickering, but as the outstanding astronomer of his time he discovered, not new continents, but new worlds. More than any individual, the man who for 30 years lived at the Harvard Observatory at Mandeville, Jamaica, gave an impetus to the science of the stars.

Back in 1899 Pickering discovered the planetoid, Phoebe. In 1909 he wrote a book, "A Search for a Planet Beyond Neptune." It was largely speculation, but he was convinced that the solar system's machinery was not running according to schedule and that only another planet exerting its force on the known worlds could be responsible. In 1919, after further study, he became mathematically certain of its existence. He plotted its course and probable location. At the same time the late Dr. Percival Lowell was working on the same idea. Then in 1929 Pluto was found. It was but a degree and a half from where Pickering had placed it and five to six degrees from where Lowell had figured its position.

Pickering was one of the first astronomers to organise distant expeditions to observe solar and lunar eclipses. His passion for mountain climbing was another indication of the explorer in him. His work for science was solid and lasting.

I.O.D.E. Scholarships

Names Of Winners In Various Provinces Are Announced

Mrs. J. D. Detwiler, national educational secretary of the Imperial Order of the Daughters of the Empire, has announced names of successful candidates for the I.O.D.E. War Memorial Scholarships (overseas) for 1938-39. Seven scholarships, each valued at \$1,400, were awarded, permitting recipients to study for one year at any university in Great Britain.

The awards:

British Columbia, George Kane, graduate of University of British Columbia; Alberta, Phyllis Mary Brewster, graduate of University of Alberta; Saskatchewan, David Mundell, reapportioned; Manitoba, Fred M. C. Goodspeed, reapportioned; Ontario, Thomas Allen, graduate of Queen's University; Quebec, David Macquieue, reapportioned; Nova Scotia, George A. Ferguson, reapportioned; New Brunswick, Gordon M. Black, reapportioned.

About 150 sizes of marbles are manufactured in the United States; they vary from the size of a pinhead to more than two inches in diameter.

The most dangerous age for children is from five to ten, according to statistics of fatal accidents in England.

Chess Prodigy

Twelve-Year-Old Girl Holds World's Championship For All Girls

Whiskers and lines of wisdom always went with the popular conception of topflight chess players until dimpled Elaine Saunders, age 12, came along.

She met Dr. Alexander Alekhine, the world champion, in a tournament in England, and, while he defeated her, he said afterwards she was a genius and caused him a lot of trouble.

For the last two years she has been champion of the open chess tournament for girls of all nationalities under 21 years. She started playing chess seriously when she was six years old, and her mother says she took to the game as easily as most children master tiddley-winks.

She likes the company of grown-ups rather than children, and thinks a lot of games one has to play at parties are silly. Her ambitions are to become an air pilot and own a riding school. She doesn't like party frocks because a person usually catches a cold and has to have medicine and doctors.

The Village Blacksmith

Five Thousand Shops Are Still Operating In The Dominion

In view of the advent of the automobile and the farm tractor, it may seem surprising to learn that there are even now some 5,000 blacksmith shops still operating in the Dominion, but such is the case, and the village boy still has an advantage over his less-favored city cousin. In the cities of over 30,000 population there are only 300 of these shops, while there are more than 4,000 in the rural areas, and over 1,000 in the villages and small places.—Kitchen Record.

Not Thing Of Past

With Britain and the United States both engaged in rearmament programs, one of the features of naval construction is the return of the battleship. For a time it was argued that the advent of the airplane and the development of the submarine had made battleships too vulnerable and that they were a thing of the past. But the battleship is back—at a cost of \$60,000,000 apiece.

England, as a nation, spends about \$80,000,000 annually on laundry work.

JOYS AND GLOOMS

Many people can safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one month. Then, if you do not feel better, return the Postum container top to General Foods, Inc., Limited, Cobourg, Ontario, and we'll refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

YOUR MONEY BACK... IF SWITCHING TO POSTUM DOESN'T HELP YOU!

Born, at the Johnson Nursing Home, to Mr and Mrs. Fred witzke on February 10th, a son.

Owing to an uncertain weather conditions, the dance at East Community, billed for February 11th, was postponed indefinitely.

Bert Metherall will pay one cent each for Gillette Lye labels. Send direct to him or leave at the Chronicle Office.

Case Tractor and farm implements will be illustrated to you in word and picture one day during the first week in March.

The United Church Ladies Aid will serve a St. Patrick's tea, next month, march 19th, in the Armories, from 3 until 7???

To make her birthday complete present a personal gift. Call at the Chronicle Office for fancy stationery. We print it reasonable.

Rev A. D. Currie was in attendance at the District Synod of the Anglican Church, held in Calgary during the week.

Rev Hunt was in attendance at the annual meeting of the United Churches of the Red Deer Presbytery, held in Didsbury on Wednesday of this week.

Congratulations are extended to Mr. and Mrs. Fred Ingham, Madden who celebrated their thirty-eight wedding anniversary Monday, February 14th.

The Misses Stella Gordon, Mabel Gordon & Salena Alton, all of Calgary, visited with the formers parents, Mr. and Mrs. A. W. Gordon, Sunday

A local rink, comprised of Messrs. G. Purvis, W. D. Carmichael, M. N. Jones and A. Stevens, is in full swing at the Olds bonspiel this week.

The Sunalta Spads of the Calgary Citywide Pee Wee Hockey League will play the local Pee Wees on Saturday night of this week. A boost will help our boys. So let's turn out and root for them,

Mr. Tom Arnott, Miss Jean Arnott, Mr. Chester Christianson and Miss Hannah Christianson took in the hockey game at Olds between the Elks and Calgary Rangers, Monday night.

Remember the Case Tractor school sponsored by Mr. A. W. Gordon to be held in the U.F.A. Hall, March 3rd, at 10 a.m. No admission charge will be made and everybody is welcome to attend these educational talking pictures.

A local rink with Messrs. C. Purvis G. Purvis, Wm. Wood and C. Fox, took in the 'spiel at Edmonton last week. The boys lost the trophy they have held for the past year and failed to bring home prizes in any of the events, just the same they report a good time, even though severe weather prevailed.

CHATTER.

Maxine Mair spent the weekend with her Sister Kathleen in Calgary Ladies Dresses! New styles and color—Ballams Grocery & Dry Goods.

Les Spivey made his last visit to Crossfield, before the big event.

Mr. and Mrs. Tom Fitzgerald returned from an extended holiday in Washington, U.S.A.

It's a fine thing to be a gentleman but it's a terrible handicap in an argument.

The Guild tea will be held February 26th, Saturday, all donations will be thankfully received for that date.

Social Credit Notes.

The Social Credit group met at the home of Mrs. Cowling on Thursday February 10th. Owing to the cold weather, the attendance was not large but a good meeting was held.

At the close of the meeting lunch was served following which a hearty vote of thanks was tendered the hostess. It was decided that the group would visit Mr. and Mrs. Butler for the next meeting on Thursday February 24th.

GOOZLES.

Ernie and Margaret asking the waitresses for some confidential information.

Three school girls being chased into the Chronicle Office by a bull, or, pardon us, we mean a nice, gentle cow.

Nora wants to know if curly hair is contagious.

Nyal carrying three-way action these days.

Oh where. Oh where is the little ming gone.

I was Monday, the Rebekah's night, Crib seemed very hard on the eyes; Walt was there and played good and tight.

But all he got was the bobby prize. We still have the Wild Fire Trophy in the Office. So what.

Who received Valentines around the town? Spring is coming. Love time's near.

Many people claim in Alberta they gain weight. This is due to the agreeable climate. It is changeable and helps to keep up a person's energy; rightly named "Sunny Alberta" In other words we always have some kind of weather, but in Saskatchewan there were days when we didn't have any weather at all.

Turn to page four for more.
